Vancouver, British Columbia V6T 1Z4 Canada

Dear Dr. Karim:

On behalf of the American Journal of Epidemiology (AJE) and the Society for Epidemiologic Research (SER), we are pleased to inform you that your article entitled “Marginal Structural Cox Models for Estimating the Association Between β-Interferon Exposure and Disease Progression in a Multiple Sclerosis Cohort” has been selected as one of the Journal’s 2014 Articles of the Year.

AJE takes great pride in publishing cutting edge papers that are leading the field of epidemiology. The Articles of the Year are chosen by the Journal’s Editorial Board and represent distinguished scholarship that will better inform epidemiologic science both now and in decades to come. Congratulations!

The names of the ten 2014 Articles of the Year will be released in the February 15, 2015 issue of the AJE. In addition, we will be formally recognizing all Articles of the Year awardees at SER’s 48th Annual Meeting to be held in Denver, Colorado on June 16-19, 2015.

Once again, we wish to extend our congratulations to you and your coauthors. Thank you for your continued contribution to AJE.

Sincerely,

Moyses Szklo, MD, MPH, DrPH  
Professor of Epidemiology and Medicine  
The Johns Hopkins University  
Editor-in-Chief, American Journal of Epidemiology

Germaine Buck Louis, PhD, MS  
Past-President, Society for Epidemiologic Research
